CHEMICAL & METALLURGICAL ENGINEERING

R. S. McBRIDE
Washington
PAUL D. V. MANNING
San Francisco
Editorial Representatives
M. A. WILLIAMSON
Manager

S. D. KIRKPATRICK, *Editor*

Chemical & Metallurgical Engineering is the successor to *Metallurgical & Chemical Engineering*, which, in turn, was a consolidation of *Electrochemical & Metallurgical Industry* and *Iron & Steel Magazine*. The magazine was originally founded as *Electrochemical Industry*.

McGraw-Hill Publishing Company, Inc., New York City

Volume XLIII

January to December, 1936

GENERAL ALPHABETICAL INDEX

Pages

January ..... 1 to 56
February ..... 57 to 112
March ..... 113 to 168
April ..... 169 to 224
May ..... 225 to 292
June ..... 293 to 348
July ..... 349 to 404
August ..... 405 to 460
September ..... 461 to 516
October ..... 517 to 572
November ..... 573 to 628
December ..... 629 to 684

A

Abrasion—Resistant alloys for materials of construction *552
Absorption—What is the reverse of absorption? F. C. Chapman (c).. 146
Word to express the reverse of absorption. H. E. Weighmatn (c).. 607

Acetic Acid:
Hydrometric nomographs for acetic acid solutions. D. S. Davis..... *27
McCabe-Thiele diagram useful in exraction problems. M. E. Othmer *325
Production in 1935 92
Acetone—Production in 1935..... 94
Agitators—See Mixing.
Agriculture—How a chemical engineer looks at the farm problem. A. W. Hixson 436
Air conditioning—Cigarette manufacturing uses modern methods. Cone, Hatcher & Greenwald..... *128
Eliminating sulphur dioxide hazard in air conditioning..... 189

Alcohol:
Alcohol-gasoline blends 211
Constructive outcome of controversy (ed) 350
Farm Chemurgic Council discusses power alcohol *315
Power alcohol plant at Atchison, Kan. H. G. Hull *352
Power alcohol transcends technology (ed) 293
Production in 1935 (tables & chart) 93
Alkali—Alkali industries girdle the globe. Tarald Ahlqvist *278
New process industry plants in the South. J. A. Lee..... *632
Aluminum—Aluminum and alloys for materials of construction *518
50 years of new product development. Frary & Edwards *64
American Ceramic Society — Columbus meeting *201
American Chemical Society — Pittsburgh meeting 494
American Gas Association—Joint conference of production and chemical committees at New York..... 323
American Institute of Chemical Engineers—England invites chemical engineers of the world for congress and exhibition *233
Members and guests who will attend International Chemical Engineering Congress *236
System for unit operations nomenclature 38

Ammonia:
Ammonia-soda alkali plants in U. S., Great Britain, Germany, France and Italy (maps) 226
Synthetic ammonia and nitrogen fixation plants in U. S., Great Britain, Germany, France and Italy (maps) 226
World synthetic ammonia production. J. Breslauer (tables)..... *282
Analyzer—Gas (E.N.) 388
Austria—Symposium on international status of chemical engineering and industry *272
Awards—W. K. Lewis receives Perkin award *32
William H. Walker award for "shaping better chemical engineering literature" (ed) 294

B

Bauxite—Bauxite in the U. S., Great Britain, Germany, France and Italy (maps) 226
Belgium—Symposium on international status of chemical engineering and industry *271
Bomb—Sampler (E. N.) 210

Book Reviews:
A.S.T.M. standards on preservative coatings for structural materials 36
Abfallstoffe der anorganisch-chemischen industrie und ihre verwertung. E. J. Fischer 205
American Gas Association Proceedings, 1935 384
Analysis and handling of gases. A. H. Gill 37
Analytische chemie der edelmetalle. Alfred Worgrinz 665
Annual survey of American chemistry. (ed) C. H. West..... 441
Back-pressure data on natural-gas wells and their application to production practices. Rawlins & Schelhardt 384
Boiler feed water treatment. F. J. Matthews 441
British plastics year book 1936.... 204
Brown's directory of American gas companies 609
Carbon dioxide. Quinn & Jones.... 496
Catalytic reactions at high pressures and temperatures. V. N. Ipatieff 608
Chauffage par les combustibles liquides. A. Guillermic 37
Chemical industries, 1936 ed. by D. M. Newitt 442
Chemical synonyms and trade names. William Gardner 609
Chemistry of the colloidal state. J. C. Ware 609
Chemistry of natural products related to phenanthrene. L. F. Fieser 496
Chemistry of synthetic resins. Carleton Ellis 147
Chromium plating. Bauer, Arndt & Krause 204
Chromium steels. R. H. Greaves... 37
Colloid symposium monograph, ed. by H. W. Welser 497
Colorimetric methods of analysis. F. D. & C. T. Snell 330
Comprehensive treatise on inorganic and theoretical chemistry. J. W. Mellor 146, 441
Corrosion resistance of metals and alloys. McKay & Worthington... 383
Crosby-Fiske-Forster handbook on fire protection 664
Crushers for stone and ore. W. T. Miller 35
Cyanidation and concentration of gold and silver ores. J. V. N. Dorr 663
Dechema werkstoffblaetter. E. Rabald 205
Der aufbau der zweistofflegierungen. M. Hansen 384
Dictionnaire de la chimie et des ses applications. Duval & Dolique.. 36
Die verfahren der anorganisch-chemischen industrie. W. Siegel 148
Elements of chemical engineering. Badger & McCabe..... 662
Engineering alloys. Woldman & Dornblatt 663
Experiments in organic chemistry. L. F. Fieser..... 35
Fabrication von absolutem alkohol zwecks verwendung als zusatzmittel zu motor-treibstoffen. M. Klar. 665
Federal Power Commission map No. 1 147
Finishing metal products. H. R. Simonds 204
Flow of natural gas through high pressure transmission lines. Johnson & Berwald..... 36
Flussaure, kieselflussaure und deren metallsalze. Oscar Kausch..... 384
Fortschritte in der anorganisch-chemischen industrie. Brauer & D'Ans 205
Fundamentals of qualitative chemical analysis. McAlpine & Soule.. 442
Further experiments upon the water gas process. J. G. King & Others 35
Galvanizing. Heinz Bablik 203
Glances at industrial research: during walks and talks in Mellon Institute. Weidlein & Hamor..... 330
Grundlagen der photochemie. Bonhoeffer & Hartek 36
Grundriss der chemischen technik. F. A. Henglein 441
Grundzuege der chemie und systematik der kohlen. D. J. W. Krenlen 665
Handbook of chemistry and physics, ed. by C. D. Hodgman..... 608
Hartmetallwerkzeuge. Karl Becker 148
Heat calculations for design and operation of furnaces. W. Helligenstaedt 35
Industrial health and safety series 36
Inorganic chemistry for colleges. William Foster 442
Introduction to the metallurgy of iron and steel. H. M. Boylston.. 204
Lehrbuch der chemischen technologie. Ost & Rassow 441
List of books and other sources of information regarding coal and coal products 37
Living together in a power age. S. S. Wyer 384
Mechanical processing of cottonseed. Woolrich & Carpenter..... 608
Metallographie, ed. by W. Guertler.. 36
Metallurgical dialogue. Albert Sauveur 204

NOTES—(c) Comment; (ed) Editorial; (E. N.) Equipment News; *illustrated; (P. N.) Plant Notebook; (S) Synopsis or abstract.

Mineral industry during 1935. G. A. Roush 664
Modern uses of non-ferrous metals, ed. by C. H. Mathewson 603
Next hundred years. C. C. Furnas 149
One thing leads to another: the growth of an industry. F. C. Kelly 329
Organic chemistry. L. J. Desha.... 663
Oxygen report 35
Perfumes, cosmetics, and soaps. W. A. Poucher 496
Petroleum refinery engineering. W. L. Nelson 147
Physical aspects of organic chemistry. W. A. Waters 383
Physical and chemical examinations of paints, varnishes, lacquers and colors. H. A. Gardner..... 329
Popoff's quantitative analysis..... 36
Power operator's guide. E. J. Tangerman 664
Principles and applications of electrochemistry. Creighton & Koehler 203
Proceedings of the second Dearborn conference of agriculture, industry and science 603
Processing the soybean. Sweeney & Arnold 37
Rubber physical and chemical properties. Dawson & Porritt..... 35
Schwefel. Erich Thieler 384
Solubility of non-electrolytes. J. H. Hildebrand 329
Stadtgas-entgiftung. Fritz Schuster 36
Sulphuric acid manufacture. A. M. Fairlie 203
Survey of biochemical activities of the acetic acid bacteria. K. R. Butlin 383
Systematic handbook of volumetric analysis. Francis Sutton 35
Technical association papers 442
Technical data on fuel, ed. by H. M. Spiers 204
Technology of plastics. H. W. Rowell 664
Theory of emulsions. William Clayton 383
Thorpe's dictionary of applied chemistry. Thorpe & Whiteley 204
Wassergas. Paul Dolch 204
Water pollution research board report 36
Wood handbook 204
Workshop receipts 383
Breathing devices (E. N.) 209

C

Cable—Flexible (E. N.)..... 613
Carbide—Story of carbide pictured at Electrochemical Society 588
Carbon black for the process industries. I. Drogin *139
Carbon black production in 1935 (tables) I. Drogin 95
Carbon monoxide as a chemical raw material. N. W. Krase *590
Carbon, structural, for materials of construction *553
Carbon tetrachloride investigation to obtain safe conditions for workers.. 313

Carboy:

Handling with safety. R. W. Lahey. *598
Carboys as receivers for semi-plant work. C. T. Weller (P.N.)..... 443
Carboys carry chemical safely and economically. R. W. Lahey..... *486
Casein—Production in 1935..... 96
Imports into U. S..... 438
Cast iron—Application of cast ferrous materials in the paper industry..... 144
Plates form durable plant roofing... 138

Caustic Soda:

Applying dialysis to colloid-crystalloid separations. H. B. Vollrath *303
Crystalline caustic by new process called Autoygen 306
Production in 1935 (charts & tables) 84
Westvaco Chlorine's caustic soda plant uses rectifiers. W. E. Gutzweiller *424
Cellulose production in Germany..... 676
Cements—Sulphur (E.N.)..... 501
Census—Confusion delays returns (ed)... 170
Ceramics—A.C.S. meeting in Columbus... 201
Chemical stoneware for materials of construction *554
Enamel frit manufacture improved by continuous smelting. T. R. Olive *642
Charcoal—Production in 1935..... 92

Chemical Engineering:

Chemical Engineering Congress of the World Power Conference. S. D. Kirkpatrick *413
Chemical engineering from a world view. Rt. Hon. The Viscount Leverhulme *416
Chemical engineer's role in America's future. C. C. Furnas *60
Development and training of the chemical engineer in Great Britain. Cremer & Underwood..... 470
England invites chemical engineers of the world for congress and exhibition *233
"The four horsemen" create jobs for chemical engineers. J. H. Perry.. 439
Life begins at graduation (ed)..... 407
No water-tight compartments for chemical engineers (ed)..... 349
Personnel problems to the fore (ed) 113
Quality—the criterion for 1936 (ed) 1
Symposium on international status of chemical engineering and industry:
Holland *273
Japan *274
China *275
Great Britain *240
Palestine *276
Norway and Sweden *286
France *257
Switzerland *262
Italy *265
Russia *268
Poland *270
Czechoslovakia *271
Belgium *271
Austria *272
Germany *50
What becomes of chemical engineers —U. S. Bureau of Labor Statistics survey 645
Who makes chemical engineers? (A.I.Ch.E. student bulletin)..... 646
World perspective of chemical engineering (ed) 225
Chemical Engineering Congress—Report on papers read at Congress..... 492

Chemical Industry:

Chemical industries carry on (ed) 169
Dangers of regimentation and complacency. K. T. Compton..... *355
Europe interested in safe practices for industry (ed.)..... 405
Foreign trade in chemicals in 1935 104
Must chemical industry be coordinated? (ed.) 573
Recent developments in the world's chemical industry. Concannon & Swift 287
Western process industries in 1935 (tables). P. D. V. Manning..... 104
What chemical industries mean in jobs and wages (charts) 468
Chemical & Metallurgical Engineering—Historical summary 3
Chemicals—Maps showing location of raw materials and process industries in U. S., Great Britain, Germany, France, and Italy 226
U. S. foreign trade in chemicals (map) 232
Chemurgic—See Farm Chemurgic Council.
Chemurgy—Movement is spreading over the country 582
Chemurgy covers the country (ed).. 574
Chlorine—Production in 1935..... 96
Chromium—Nickel-iron alloys for materials of construction 548
Clay Product Plant Operators' Conference 391
Cleaning steel—chemically. R. L. Davies *606

Coal & Coal Products:

CO as a chemical raw materials. N. W. Krase *590
Coal products in the U. S., Great Britain, Germany, France and Italy (maps) 226
Extraction of coal by Pott & Broche process in Germany. Otto Fuchs.. 637
Nomograph for coal analysis conversions. D. S. Davis (P. N) *331
Production of dyes and coal tar chemicals (tables) 97
Production and sales of crude coal-tar products 1934 and 1935..... 395

Coke & Coking:

Byproduct coke in the U. S., Great Britain, Germany, France and Italy (maps) 226
Byproducts from coke-oven operations in 1934 (table) 98
Gas industry trends. R. S. McBride *602
Combustion safeguarding (E. N.)..... 389
Compressor, rotary (E. N.)..... *210
Condenser designed for steam distillation. C. A. Lee..... *372
Vacuum producing equipment for chemical plant use. C. T. Chave.. *190

Containers:

Chemicals automatically packed in paper bags. R. W. Lahey *318
Fiber drums for shipping chemicals. R. W. Lahey *196
Handling and shipping of hydrofluoric acid. Leonard Church.... *366
Multi-wall paper bags offer attractive opportunities. R. W. Lahey. *376
Quick acting closure for pressure vessels. F. G. Laupichler (P. N.) *387
Regulations for transportation of explosives and other dangerous articles amended 31
Returnable drums for handling chemicals. R. W. Lahey *28
Selecting most suitable drum for your requirements. R. W. Lahey.. *132
Transferring refrigerant gases to small cylinders *207

Controllers:

Cigarette manufacturing uses technical control. Cone, Hatcher & Greenwald *128
Current input controller (E. N.)..... 209
Flow controller (E. N.)..... *499
Valve controller (E. N.)..... 388
Variable speed belt weigher controls alum feed. F. A. Westbrook (P.N.) *332
Conveyor—Moving pipe (E. N.)..... *610
Why pulsations occur in chain conveyors. C. A. Lee..... *199
Copper and alloys for materials of construction *520

Corrosion:

Metals resisting corrosion—Chemical Engineering Congress 419
Nickel alloys for low and high temperature service. B. B. Morton... 136
"Old man corrosion." R. J. McKay (c) 662
Protective coatings for corrosion resistance *555
Tantalum sheathing solves corrosion problem, H. W. Paine 473
Vacuum deaeration combats cold water corrosion. Powell & Burns.. *180
Costs—Applying the yardstick of production costs and market statistics. F. J. Curtis 76
Robinson-Patman anti-price discrimination law (ed) 461
Cracking Development Conference 565
Crystallization—Caustic soda by new process called Autoxygen 306
Cyanamide—Capacity of cyanamide plants of the world (table) 285
Czechoslovakia—Symposium on international status of chemical engineering and industry *271

D

Deaeration—Vacuum, combats cold-water corrosion. Powell & Burns..... *180
Dialyzers—applying dialysis to colloid-crystalloid separations. H. B. Vollrath *303

Distillation:

Caustic soda by new process called Autoxygen 306
Designing a condenser for steam distillation. C. A. Lee..... *372
Distillery advances (A.I.C.E. meeting) 581
Model of modern distillery at the Great Lakes Exposition..... 640
New hookup successful in vacuum distillation. Sydney Steele (P. N.). *387
Partial pressure chart for steam distillation. C. A. Lee (P. N.)..... *443
Pine products distillation at New Orleans. J. B. Nealey *20
Rye distillery of the Calvert Distilling Company visited by A.I.C.E.. *576
Wine making. E. Humboldt..... *651
Drive—Centrifugal (E. N.)..... *333
Mill drive (E. N.)..... *334

Drying:

Dryer, rotary louver (E. N.)..... *611
Dryer, unit spray (E. N.)..... *610
Flash drying for materials of high moisture content. R. F. O'Mara.. *186
Modern methods of cigarette making. Cone, Hatcher & Greenwald..... *128
Production of magnesium compounds from sea water. P. D. V. Manning. *116
Rotary steam dryer (E. N.)..... *208
Dust counter (E. N.)..... *612
Dust and fume handling—Why soya bean oil plants exploded 120
Dyes—Production of dyes and coal tar chemicals in 1935 (tables)..... 97

E

Economics — Government disbursements (ed) 3
Who are the real advocates of inflation? (ed) 170

Editorials:

Accidents won't wait 575
"Anti-trust" potash inquiry 463
Better non-metallic raw material... 631
Careers after forty..... 630
Caution needed amidst commotion... 2
Census confusion delays returns..... 170
Census questions deserve prompt answers 3
Chemical industries carry on..... 169
Chemurgy covers the country 574
Colloidal fuel may check oil prices.. 407
Constructive outcome of a controversy 350
Drought and process industry 462
Eyes, but they see not 294
Fifty full years of research..... 574
Four cost-minded chemical engineers 461
Fuel interdependence 631
Go forth and spread the gospel!.... 171
Hail and farewell..... 630
Lafayette's contribution and tradition 115
Life begins at graduation 407
Life begins with research 57
Long, Long road 575
Misnomer shows loose thinking..... 3
Must chemical industry be coordinated? 573

NOTES—(c) Comment; (ed) Editorial; (E. N.) Equipment News; *Illustrated; (P. N.) Plant Notebook; (S) Synopsis or abstract.

Must taxes be punitive? 114
No partnership wanted 462
No room for secrecy here 405
No water-tight compartments for Chemical engineers 349
On taking "time to think" 2
Paper boom in the South 171
Personnel problems to the fore..... 113
Pittsburghers point with pride..... 3
Power alcohol transcends technoloby 294
Profits from wastes 351
Progress report on domestic potash.. 350
Quality—the criterion for 1936..... 1
Revealing a 20-year old secret..... 115
Spain upsets some markets..... 406
Speed vs. safety in experimentation. 295
T.V.A. must proceed with caution.. 114
To a builder of better literature..... 294
Toward a more secure peace..... 926
What industry means to America.... 406
Who are the real advocates of inflation? 170
World perspective of chemical engineering 225
Your materials handbook 517
Electrochemical plants, choosing conversion units for. C. C. Levy..... 658
Electrochemical Society—Cincinnati meeting 185
Niagara Falls meeting 588
Officers elected..... 289
Enamel frit manufacture improved by continuous smelting. T. R. Olive.*642
Engine, Diesel (E. N.)..... *334
Engines, steam, contribute to heat-power balance. F. J. Vonachen..... *654
Engineering—Whither engineers? and engineering education? W. N. Jones *310
Engineers—On taking "time to think" (ed) 2

Evaporation:

Flash evaporation (A.I.C.E. meeting) 581
Lactic products from milk sugar T. R. Olive *480
Exchanger, pressure, Moses & Latham .. *375
Exhibitions—World chemical congress and exhibition to be held in England .. *233
Explosions in soya bean oil plants 120

Explosives:

Production in 1935 (table) 98
Regulations for transportation of explosives and other dangerous articles amended 31
Exports and imports—Reciprocal agreements affect foreign trade in chemicals 381

Extraction:

McCabe-Thiele diagram useful in extraction problems. M. E. Othmer *325
Removal of hydrogen sulphide from blue-water-gas. A. R. Powell *307
Soy beans help build Fords. R. L. Taylor *172

F

Factory of all-glass and windowless *127
Farm Chemurgic Council—Power alcohol controversy gives way to broader program at Detroit meeting...*315
Farms—See Agriculture.
Feeders—Automatic silicate feeder (E.N.)*612
Feeder, liquid (E.N.) *334
Fermentation—Lactic products from milk sugar. T. R. Olive *480
Rye distillery of the Calvert Distilling Company visited by A.I.C.E. .*576

Fertilizers:

Fertilizer chemicals in U. S., Great Britain, Germany, France and Italy (maps) 226
New process industry plants in the South. J. A. Lee..... *632
Operating observations at T.V.A. fertilizer plant. Curtis & Miller.... *408, pt. 2, 647
Producing hydrogen by catalytic water gas reduction. F. G. Laupichler *122
Production in 1935, (charts) R. S. McBride 87

Filtration:

How filter types fit into process requirements. E. A. Alliott..... *476
Production of magnesium compounds from sea water. P. D. V. Manning *116
25 years of chemical engineering's progress in filtration. Arthur Wright 638
Valveless rotary filter (E.N.) *333
Fluorine—Production in 1935 98
Foam-making nozzle (E.N.) *500
France—Maps showing location of raw materials and process industries .. 226
Symposium on international status of chemical engineering and industry *257

Fuel:

Colloidal fuel may check oil prices (ed.) 407
Farm Chemurgic Council discusses power alcohol *315
Power alcohol plant at Atchison, Kas. H. G. Hull *352
Trends in inter-fuel competition. R. S. McBride 14
What source future fuel? 13
Furnaces—Enamel frit manufacture improved by continuous smelting. T. R. Olive *642
Radiant tube furnace (E. N.)..... *611

G

Gas:

American Gas Association discusses manufacturing gas industry problems 323
CO as a chemical raw material. N. W. Krase *590
Calculation methods for high pressures *32
Developments in the gas industry—Chemical Engineering Congress .. 419
Hydrogen sulphide removed from blue-water-gas. A. R. Powell *307
Manufactured and natural gas produced in 1935 (table) 99
Natural gas uses in the production of carbon black. I. Drogin *139
Pressure gas storage station operates automatically (P. N.)..... 666
Producing hydrogen by catalytic water gas reduction. F. G. Laupichler *122
Purification of city gas—Chemical Engineering Congress 419
Transferring refrigerant gases to small cylinders *207
Trends in the gas industry. R. S. McBride *602
Trends in inter-fuel competition. R. S. McBride 14
Trends in production of compressed gases (charts) 100
Where compressed gases are produced in the U. S. 101
Gasoline—Vapor balloon for storage. R. S. McBride *426

Germany:

American Chemical Engineers visit Germany. S. D. Kirkpatrick.....*464
Cellulose production in Germany.... 676
Maps showing location of raw materials and process industries 226
Symposium on international status of chemical engineering and industry *250
Will chemical engineering solve Germany's problems? Otto Fuchs.... 637

Glass:

Batching glass electrically *596
Glass, glass-lined and fused silica for materials of construction 556
New safety glass. Sherts & Fix ..*177
Polarizing glass (E. N.) 151
Glycerine—Production of glycerine 1927-1936 628
Graphite—Graphiting furnace described at Electrochemical Society 588

Great Britain:

Chemical engineering development and training. Cremer & Underwood 470
Chemical engineers of the world invited for congress and exhibition.*233
Maps showing location of raw materials and process industries 226
Symposium on international status of chemical engineering and industry *240
Great Lakes Exposition—Model of modern distillery 640

H

Heat exchange — Chemical Engineering Congress discusses 419
Heat-power balance, steam engines contribute to. F. J. Vonachen.....*654
Heat transfer — Nomographic chart for logarithmic mean temperature difference. E. L. McMillen (P. N.).*386

Safety:

Accidents won't wait (ed) 575
Carbon tetrachloride investigation to obtain safe conditions for workers 313
Economics of safety (A.I.C.E. meeting) 581
Eliminating sulphur dioxide hazard in air conditioning 189
Eye conservation (ed) 294
"Eyes, but they see not." T. F. Corcoran (c)..... 607
Handling carboys safely. R. W. Lahey *593
Non-sparking tools help make process industries safe *604
Opportunities in safety work for chemical engineers. J. H. Perry.. 439
Safety heads (E. N.) *388
Soya bean oil plants have explosives 120
Speed vs. safety in experimentation (ed) 295
Static electricity hazards in solvent handling. J. T. Morris 484

Salt:

Increasing brine output from salt beds. E. N. Trump *364
Salt in the U. S., Great Britain, Germany, France and Italy (maps) 226
Viscosity nomograph for salt solutions. D. S. Davis *485
Scales—Continuous conveyor scale (E. N.) 333
Schools—M. I. T. students practice chemical engineering at mills..... *369
Screen—Double action screen (E. N.)..... *500
Vibrating screen (E. N.) *501
Separation—Dry powder separator (E. N.) *210
Wet separator (E. N.) *151

Shipping:

Carboys carry chemicals safely and economically. R. W. Lahey..... *486
Fiber drums for shipping chemicals. R. W. Lahey *196
Handling and shipping for hydrofluoric acid. Leonard Church..... *366
Multi-wall paper bags offer attractive opportunities. R. W. Lahey.. *376
Sifter—(E. N.) *389
Silver and alloys for materials of construction *529
Soap—Soap in the U. S., Great Britain, Germany, France and Italy (maps) 226
Solvents—Flexibility predominates in design of Sharples Solvents pilot plant. R. L. Taylor *474
Static electricity hazards in solvent handling. J. T. Morris 484
Southern process industry plants of recent date. J. A. Lee..... *632

Soybeans:

Extraction of phosphatides from soybeans. A. A. Horvath 418
Ford Motor Co. uses soybeans to build cars. R. L. Taylor *172
Oil plants have explosions..... 120
Utilization of soy bean products increasing 184
Spain upsets some markets (ed)..... 406
Speed drive (E. N.) *208
Standards—A.I.C.E. system for unit operations nomenclature 33
Steam—Partial pressure chart for steam distillation. C. A. Lee (P. N.).... *443
Steam compressed for producing higher temperatures (P. N.)..... *206

Steel:

4 to 10 chromium steels for materials of construction *534
Cleaning steel-chemically. R. L. Davies *606
High-carbon stainless steels for materials of construction..... *540
Low-alloyed steels for materials of construction *551
Low carbon stainless steels for materials of construction *536
Still—(E. N.)..... 611
Strainer—Pipe line (E. N.)..... *334

Sulphur:

Recovery of free sulphur from spent oxide—American Gas Association meeting 323
Removal of hydrogen sulphide from blue-water-gas. A. R. Powell..... *307
Sulphur and pyrites in the U. S., Great Britain, Germany, France and Italy (maps) 226

Sulphur Dioxide:

Eliminating sulphur dioxide hazard in air conditioning 189
SO_2 chart for low concentrations. D. S. Davis *433
Strong sulphuric acid from wet sulphur dioxide. H. E. Woisin *301

Sulphuric Acid

Nomograph for calculation of mixtures of oleum and sulphuric acid. D. S. Davis (P. N.) *150
Production in 1935 (charts & table) 83
Proportional chart solves oleum-acid mixtures. J. S. Baker (P. N.)..... 332
Strong sulphuric acid from wet sulphur dioxide. H. E. Woisin *301
Sweden—Symposium on international status of chemical engineering and industry *286
Switch—Electric level (E. N.)..... 613
Switch—Float (E. N.)..... *501

Othmer, Murray E. McCabe-Thiele diagram useful in extraction problems *325

PAINE, Harold W. Tantalum solves severe corrosion problem.....473
Paulson, E. W. Chemical industry and engineering in Norway..... 286
Perry, John H. Man location *68
"The four horsemen" create jobs for chemical engineers 439
Pierce, James E. These charts solve orifice equations (P. N.).....*498
Pollak, J. Austrian chemical industry a post-war development.....*272
Powell, A. R. Removal of hydrogen sulphide from gas *307
Powell, Sheppard T. & H. S. Burns. Vacuum deaeration combats cold-water corrosion *180
Pratt, J. Davidson. Great Britain produces chemicals for world consumption *244

REAVELL, J. Arthur. Depression proved a boon to chemical plant makers 247
Roth, Walter. Potash and bromine among new products of Palestine.....*276

SANSONE, Raffaele. Self sufficiency is goal of Italian chemical industry 267
Schmidt, A. W. Training chemical engineers in Germany 253
Sellier, E. France stands fourth in world chemical production *257
Sherts, J. H. & E. L. Fix. New safety glass *177
Staniar, William & L. G. Benton. Better lubrication means lower maintenance *296
Lubrication that makes for low cost operation *428
Steele, Sidney. Compact temperature conversion chart with wide range (P. N.) 39
New hookup successful in vacuum distillation (P. N.) *387
Sumerford, S. D. & A. McLaren White. New data on design of simple paddle agitators *370
Sviatlovski, E. Chemical engineering and industry in Russia.....*268
Swift, A. H. & C. C. Concannon. Recent developments in the world's chemical industry 287

TAYLOR, R. L. Flexibility predominates in design of solvents pilot plant *474
How soybeans help build Fords.....*172
Travers, A. French engineering training is graduate school function..... 261
Trump, Edward N. Increasing output from salt beds *364
Turrentine, J. W. Potash production increased during 1935 (tables).... 88
Tyler, Chaplin. Sales development: new field of chemical engineering.... 72

UNDERWOOD, A. J. V. & H. W. Cremer. Chemical engineering development and training in Great Britain 470

VOLLRATH, H. B. Applying dialysis to colloid-crystalloid separations...*303
Vonachen, F. J. Steam engines contribute to heat-power balance.....*654

WEIGHTMEN, Hugh E. Metal lining improves concrete tanks 373
That reverse of absorption (c)..... 607
Weller, C. T. Carboys as receivers for semi-plant work (P. N.)..... 443
Westbrook, Francis A. Variable speed belt weigher controls alum feed (P. N.) *332
White, A. McLaren & S. D. Sumerford. New data on design of simple paddle agitators *370
Wilhelm, A. Swiss chemicals recovering.. 262
Williams, Clyde E. Metallurgical trends of chemical engineering interest 17
Woisin, H. E. Strong sulphuric acid from wet sulphur dioxide.....*301
Wright, Arthur. 25 years of chemical engineering progress in filtration 638
